

# SUNWOOD ENGINEERING

TOTAL ENGINEERING SOLUTIONS

## **ENVIRONMENTAL POLICY**

Sunwood Pty Ltd (Sunwood Engineering) provides total engineering solutions to an extensive range of industry sectors in Queensland and throughout Australia. Services include CNC machining, general machining, product and custom componentry design and assembly, stainless steel component bead blasting and steel fabrication services.

Sunwood Engineering recognises that the activities it undertakes within its production workshops have the potential to impact the environment. This environmental policy applies to activities carried out by Sunwood Engineering and its contractors and ensures the associated environmental values and requirements are managed.

We understand the importance of integrating environmental management into everyday business activities. As such, the objective of this environmental policy is to minimise the impact on the environment as a result of our business activities.

To achieve this objective we will:

- Establish and maintain an environmental management system in accordance with AS/NZS ISO 14001;
- Comply with relevant legislation and other criteria to which the company subscribes;
- Establish defined environmental objectives and targets to measure our performance and identify opportunities for improvement;
- Educate our employees and contractors on key environmental issues, management controls and associated responsibilities;
- Strive to prevent pollution, reduce waste and commit to recovery and recycling where feasible; and
- Regularly review business operations to identify and implement opportunities for continual improvement.

Protecting the environment is a team responsibility and Sunwood Engineering has developed procedures to manage and minimize adverse environmental impacts from our operations. Within the Sunwood Engineering team, every individual has a responsibility to bring to management attention any procedures or incidents which may cause or potentially cause environmental harm.

Sunwood Engineering's environmental management system (EMS) provides the framework for working towards and regularly reviewing objectives and their associated targets. As such, we are also committed to maintaining and continually improving upon our EMS.

Sunwood Engineering will communicate this policy to all employees, contractors and management and expect that they act in a way to support the aforementioned commitments and objectives.
